Reaction Characteristics

In the all new Blitz series, Brunswick engineers have combined superior technology, used in our high performance line to produce two mid-price promotional masterpieces that put the finishing touches on the worlds Perfect Line Up of bowling balls.

The Blitz series features two balls perfect for medium to dry lane conditions and the entire spectrum of bowler styles.

Notes on Drilling

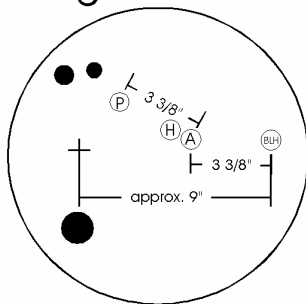

All weights of the **Blitz** line can be drilled using the techniques developed for two-piece balls. See Brunswick's "Seven Popular Layouts" for detailed drilling information. Note: For the 3 piece Blitz's treat the heavy spot as a combination heavy spot and pin.

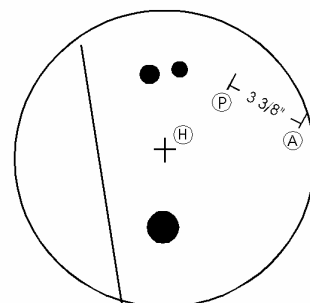

SEVEN POPULAR LAYOUTS

MAXIMUM
TRACK FLARE
HIGH
REACTIVITY

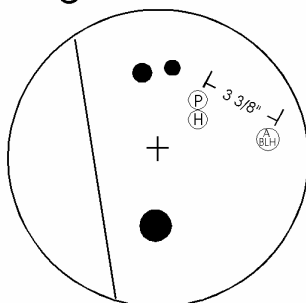

1-Leverage Pin with 9" hole

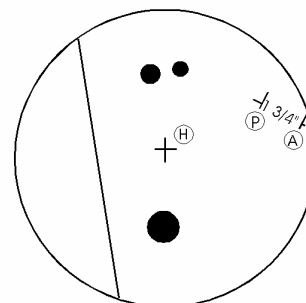

2-Leverage Pin-heavy spot toward grip center

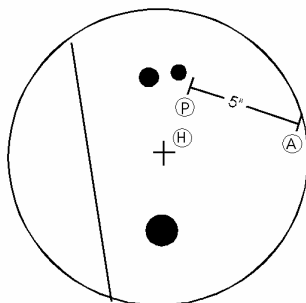

3-Leverage Pin with Axis hole

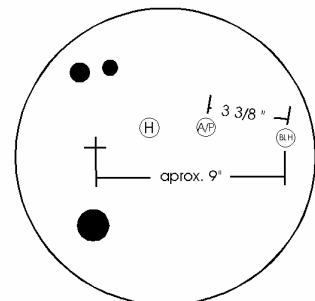

5-Pin between Axis and Leverage

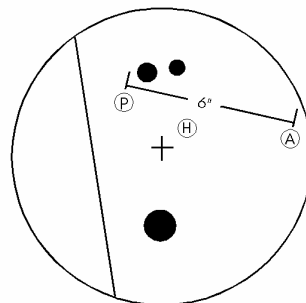

4-Positive label shift

6-Axis Pin with 9" hole

7-Negative label shift

MINIMUM
TRACK FLARE
LOW
REACTIVITY

(P) = Pin

(H) = Heavy Spot

(A) = Axis

(BLH) = Balance hole
