

Information Sheet

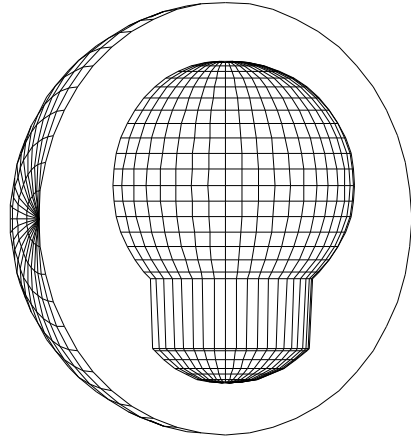

Walter Ray Williams Jr. MVP™

Part Number

60-102945

Specifications

PowrXtend™ Reactive Coverstock
Polished finish
Hook Potential: 17.5 - 9.5 (dull/shiny)
Typical Length: 4
Typical Backend: 10
RG Max: 2.584
RG Min: 2.553
Average RG: 4.8
RG Differential: 0.031
Track Flare: 6.4

Reaction Characteristics

Brunswick is proud to introduce to you the new Brunswick MVP™ Series of bowling balls. The MVP Series features the names of top PBA tour champions, like Johnny Petraglia, Walter Ray Williams, JR., Mike Aulby and Parker Bohn III. Each ball has been individually designed by the most exacting science in bowling to fit each bowler's particular style. Each player has taken an element of Brunswick technology, blended it with his years of pro tour experience, and created a ball that meets his own demanding standards.

Walter Ray Williams, Jr. likes balls that allow him to stay square to the lane when they're freshly oiled, but add some speed and hook it some as the lanes dry out. To create this type of characteristic, Walter chose the higher Rg, medium differential Gold Rhino Pro core and combined it with the Combat Zone coverstock to give a ball that gets down the lane and makes a strong move in the backend without overkicking off of the dry boards.

Drilling Information

All weights of the Walter Ray Williams Jr. MVP ball can be drilled using techniques developed for two-piece balls. See Brunswick's "Seven Popular Layouts" for detailed drilling instructions.
